

## SHOWERS & EYEBATHS

Your Safety Demands Our Quality

### TECHNICAL DATA SHEET

#### COMBINATION EMERGENCY DRENCH SHOWER AND EYEWASH

##### MODEL S370

Free-standing emergency combination drench shower + eyewash with stainless shower head operated by a stay open ball valve with rigid pull rod. The unit is constructed of Stainless 304 pipework, with floor flange for rigid support.

The eyebath unit is a stainless basin with twin dual function eyewash heads which offer spray and aerated flow.

The eyebath is also fitted with an unique Flo-Jo® self-draining device which reduces the risk of freezing and build up of bacteria.

Dust caps are fitted to eye/face wash heads as standard.

All units are supplied with a rigid safety sign.

Recommended flow pressure to be available on supply line 35-60 psi (2.5 - 4 bar)

##### Installation:

Prior to installing equipment ensure mains water supply pipe is thoroughly flushed.

##### Packaging:

Dimensions: 1110 x 380 x 375 mm  
Approx Weight: 21.5 kgs.
